#### Read and write the story in cursive writing.

One day, a saint and his followers stopped by a pond full of fish, the saint started filling his mouth with live fish. The followers were amazed at this and began to do just as their master was doing.

Then without saying a word, the saint started moving and stopped by a pond that had no fish at all, then, he knelt by the pond and began to remove live fish from his mouth and free them into the pond. When the followers tried to do the same, they found that all the fish they had kept in their mouths were dead! Seeing this, the saint said "How could you blindly follow what I had done? Did anyone of you not think to ask me first whether I had swallowed a bit of water to keep the fish in my mouth alive? Please never follow a leader blindly but use your own intellect to guide you!"

One day,

**Lunar Eclipse** 

When the Earth comes in between the Sun and the Moon, the shadow of the Earth falls on the Moon and the Moon becomes invisible. This phenomenon is called Lunar Eclipse.

#### Read and write the story in cursive writing.

There was a crow. It was very thirsty. It was flying here and there in search of water. But it could not find water anywhere. It got tired and sat on a tree. Suddenly it saw a pitcher. The crow flew over to the pitcher. It saw water in it, but there was a little water in the pitcher. The crow was very clever. There were some pebbles near the pitcher. One by one he dropped many pebbles into the pitcher. Finally the water level in the pitcher came up and the crow quenched his thirst and flew away.

#### Read and write the paragraph.

 $\Omega$ 

Pollution is the contamination of the natural environment, which exists around us and helps in normal living. Any type of pollution in our natural surroundings causes insecurity, health disorders and discomfort in normal living. It disorganizes the natural systems and thus disturbs the nature's balance.

The pollutants or elements of pollution are foreign substances or waste materials created by the human beings which pollutes the natural resources like air, water or soil etc. The chemical nature, concentration and long persistence of the pollutants continually disturbs the ecosystem. The pollutants can be poisonous gases, pesticides, herbicides, fungicides, noise, organic compounds and radioactive materials.

We should try to reduce the use of such pollutants and make a cleaner environment. This will be our tribute to our motherland-Earth.

## Read the dialogues and write them below.

Student: May I come in, Sir?

Teacher: Yes, stand here. Why do you always come late?

Student : Sir, it is the bus which makes me late.

Teacher: At what time do you leave home?

Student : I always leave home at quarter to 7.

Teacher: How far is your school from home?

Student: It is about 3km from here.

Teacher: My dear, you leave your home very late. It is a bad habit.

Change your routine. Always get up early in the morning, offer

your prayers and go for a morning walk.

Student : You are right sir. From tomorrow, I shall never be late.

Teacher: Good, one thing more keep in mind, regularity and

punctuality conquer the mountains.

Student: Thank you! for your advice sir.

#### Read and write the story.

Emperor Akbar was very fond of Birbal and favoured him. This made the other courtiers at Akbar's court jealous of Birbal. One day when Akbar was receiving service from his barber. A crow sits beside the Akbar, wicked Barber pointed to the crow and said to the king that it is a messenger of his ancestors from heaven. They might be in problem. Hence, king should send Birbal to the heaven to resolve their problems. Birbal has to get inside a heap of grass which will be set on fire by the king.

### Read and write the greenhouse effect in cursive writing.

The greenhouse effect is a process that occurs when gases in Earth's atmosphere trap the Sun's heat. This process makes Earth much warmer than it would be without an atmosphere. The greenhouse effect is one of the things that makes Earth a comfortable place to live. In spite of the damage caused by greenhouse effect and global warming, in its absence, temperature of Earth may slide down to almost -18° Celsius.
